### 2. Data Part

One record includes only one station observation in principle. However, at least 3 records are included for the event of ROS/CTD. The definitions of records are as follows,

- STNNBR: Station number
- CSTNO: Cast number only for CTD, ROS, BOT. '-9' is filled for the rest
- CAST TYPE: Cast type(listed in Table2)

- DATE: Date of observation(Japan Standard Time)
- JST TIME: Time of observation(Japan Standard Time)
- EVENT CODE: Type of event (listed in Table3)  
(For event code corresponding to each cast code, please refer to Table4.)
- POSITION (LATITUDE, LONGITUDE): Position of ship
- NAV: Navigation system(listed in Table5)
- DEPTH: Water depth to the bottom
- F: Flag of water depth(listed in Table6)
- SUBSTN: Substation number Belows are documented only for BTM/MRE cast type in CTD/ROS/BOT event
  - HT ABOVE BOTTOM: Distance from the sea bottom
  - WIRE OUT: Length of wire-out
  - MAX PRESS: Maximum pressure in each cast
  - NO. OF BOTTLES: Number of bottle for sampling
  - WATER COLOR: Color of sea in Forel-Ure scale.
  - TRANS(ANG): Transparency(wire angle)
  - PARAMETER: Parameter numbers correspond to measured or sampled elements (listed in Table7)
- COMMENT: Remarks
